An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: At page 1, line 6, after "2000," insert --now US Patent 6660302,---.

The following is an examiner's statement of reasons for allowance: This is a continuation of 09/656082, now US Patent 6660302. In the parent application it was determined during prosecution that the viscosity range recited in the instant claims was unique to the invention, this viscosity range being obtainable only by the process of making disclosed. The properties of the dry composition formed, the aqueous solution thereof and the film composition have been shown dependent upon the method by which the dry powder composition is made, as exhibited by the viscosity range recited. The additional art cited by the examiner is considered relevant to the instant claims, but does not teach or suggest the combination recited in the instant claims having the critical viscosity range required.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M Brunsman whose telephone number is 571-272-1365. The examiner can normally be reached on M, W, F, Sa; 6:00-4:30.
